Semper in a browser

Semper in a browser

The conversion of your Semper system into a browser is well under way. Lets show you how it looks and works..

We will release the new version in phases and make these available to you. This will be done ***without disrupting*** your current operations. You can use the new functions ***remotely*** from a PC, Laptop or Tablet. Your information is accessed via our central server from your local system via a secure link and delivered to a standard browser such as Chrome.
As we add new features, they will become instantly available.
This method will enable you to try out each new feature as they get released and at the same time familiarise yourself with the new browser system which is modern and colourful.

The goal is to complete the entire Semper system and all features you currently use and once completed to give you the option to move your entire system to a hosted server or to run your system locally as you do now.

The first phase is the Management Dashboard (available within two weeks) is aimed at managers who wish to receive information on their smart phones, tablets or PC's (Including a Apple Mac). Information available via the dashboard is typical high level management information such as daily revenue, cash flow analysis. deposits received, projected income, management alerts and much more….

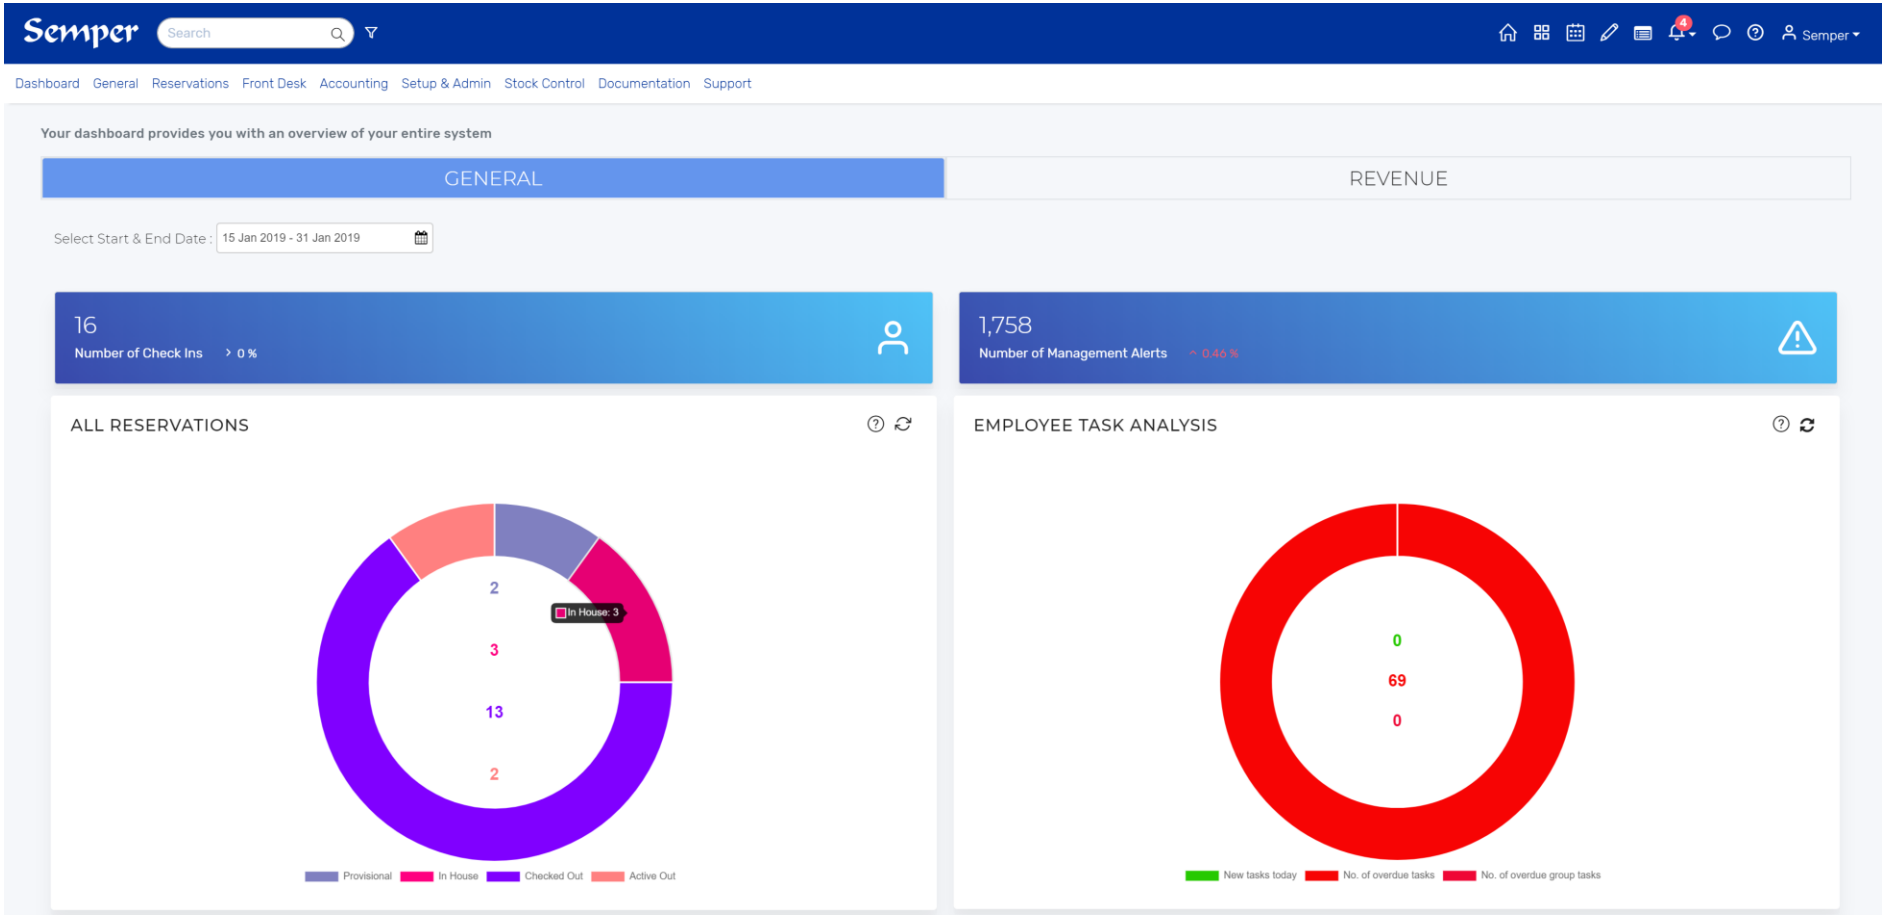

The next phase is the Reservation system which will enable you to record and manage your reservations remotely.

Introducing the new Management Dashboard

- Management information delivered directly to a managers cell phone, tablet or PC directly from your Semper system. All delivered in a browser.

- You choose what information you wish to receive:
  - ✓ Reservations arriving, in house or departing for a selected date or period
  - ✓ Future projected income
  - ✓ Employee tasks analysis
  - ✓ Management alerts highlighting issues that need attention such as backups not made, rates that are about to expire, incomplete stock takes or not closed, reservations with zero or missing transactions etc..
  - ✓ Occupancy analysis
  - ✓ Revenue for a selected day-end or period
  - ✓ Deposits received
  - ✓ Cashflow analysis

- Drill down to the detail from your management dashboard
- The following slides are examples of the look and feel of the new browser system and specifically the management dashboard ….
