

Introducing BookingSuite RateManager.

Improve your pricing strategy in less time.

BookingSuite RateManager is a sophisticated revenue management tool that is easy to set up, easy to use, and easy on your budget.

- **Powerful software that provides custom rate recommendations and occupancy forecasts for every day, 360 days into the future**
- **Recommendations that adjust with changing conditions, such as: a new reservation or cancellation, a competitor price change, or an unexpected event scheduled**
- **Price updates that are distributed to all connected channels with a single click**

BookingSuite

Setting the right price is the single best way to improve your profits. Even the most experienced GMs and revenue managers need the right tools to help them make pricing decisions. With BookingSuite RateManager, you can improve your pricing strategy and spend less time doing it. **And you always maintain full control.**

BookingSuite RateManager

Features:

- Powerful rate recommendation algorithm that considers multiple inputs and uniquely leverages Booking.com data
- Demand forecasts, accurate rate recommendations, and rate shopping for 360 days in advance
- Your choice of either one-click or automated uploading of rates to your channel manager
- Group quote capability, flexible pricing options, and constant feature improvements
- Cloud-based hosting means it's easy to setup and easy to use

Our algorithm considers:

- PMS Data
- Historical Rate Strategy from Booking.com
- Aggregated Demand Data from Booking.com
- Competitor Prices
- Local Events Data
- Your Property's Strategy
