SEMPER RELEASE NOTES

Version 271

This is a brief overview of all changes and bug fixes made to the SHD system since the previous SHD Release.

BUG FIXES:

1. Ticket Search - was very slow when searching for a ticket using a keyword.
2. Users were not able to copy and paste from one field to another.
3. A message must pop-up if no port is specified in the NO-IP field.
4. All tickets must cc the responsible area agent(s) for the client as specified on the SHD.
5. When deleting the last comment from the comments section, the system would delete all the comments.
6. When creating a ticket and only selecting save the system did not generate an email.
7. Renamed the WCF label to Cloud URL.
8. Ticket Search - When searching for a ticket under a specific venue using the keyword function, the system was returning tickets for other venues as well.
9. When adding more than one contact onto a venue and selecting the 'invoice' check box then saving & closing and going back into the venue, the system duplicated the new contacts added.
10. No longer cc freddie@semper.co.za into the ticket emails, change it to support@semper.co.za.
11. When generating the report to see all clients for a specific area and no dates are selected the report is not showing me all the clients for that area.
12. When editing the description on a ticket and save it, it did not re-generate the email.
13. Received an error message when closing a ticket.
14. When you select the dashboard product and select either Save or Save & Close, the dashboard product did not save on the client.
15. New security setting – added a security setting for the “Client consent form received” to only allow admin users to change it.
16. New security setting – added a security setting for the “Online bookings T&C’s received” to only allow admin users to change it.
17. Could not minimize the venue details screen on a laptop.
