SECTION 1:
SEMPER - ENHANCEMENTS

POINT OF SALES

POS APP

1. Added the ability to post to the accounts on the Reservations database when using the POS API.
2. Added the ability to post to in-house reservations on the Reservations database when using the POS API.

INTEGRATIONS

Experience Hotel

1. Guests' birth dates can now be retrieved.
2. When retrieving reservations with a confirmed status, the reservations are retrieved as provisional.

SECTION 2:
SEMPER WEB - FIXES

QUOTES

1. When generating a quote, the transaction description did not show the per night value.
2. When the Standard Summary invoice setup setting is selected, and the Per Person or Per Night setting is selected under "What must display on invoice lines" and the rate charged is a per unit rate the description on the transaction was not correct.

SECTION 3:
SEMPER - FIXES

RESERVATIONS

Transactions

1. Transactions had the letter 'B' next to it for clients who aren't using the Inspur ESD device. This must only be displayed for clients using the Inspur ESD device.
2. Made adjustments to the calculation of levies setup on the second levy setting (African Countries).
3. Made adjustments to the calculation of taxes when charging an expense (Casual Sale, Reservation, Debtors).
