Semper

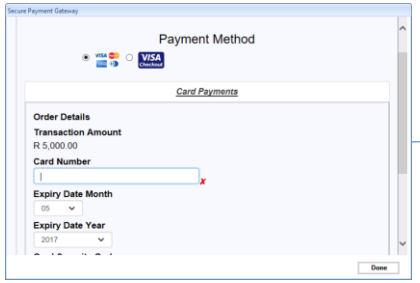

Semper ePay

Semper ePay is an eCommerce payment system that enables payments via the internet

It is your own payment system

A quick and easy way for guests or companies to process their own payments from anywhere in the world

How does ePay work?

Internet

Virtual card services

DIRECT PAY ONLINE

- ✓ The system utilises a secure payment system to process transactions via the Internet using Virtual Card Services (VCS) to process eCommerce payments.
- ✓ Semper's ePay activates the VCS system and passes all information. VCS processes the payments into Direct Pay Online account
- ✓ Payment is distributed to you on a weekly basis (after commission deducted)
- ✓ The system supports 3D Secure system (i.e. Pin based for Merchants that use 3D secure)
- ✓ Imbed your payment system into your website for easy access. See http://www.cleomountain.com/ (select the brown payment option to view)
- ✓ For on-line bookings via your website, your payment system is automatically imbedded and activated ensuring a deposit is paid
- ✓ For electronic check out using a tablet - epay gets displayed and the guest processes the payment via the internet (no need for a credit card machine)
- ✓ For Guest Online Services (where a guest can access their account from a cell phone or tablet, an option to pay the balance directly from the cell phone or tablet)
- ✓ Imbed an epay link in any document you email to a guest that opens your payment system and enables easy payment

ePay everywhere you need it to be
