Introducing the
Management Dashboard

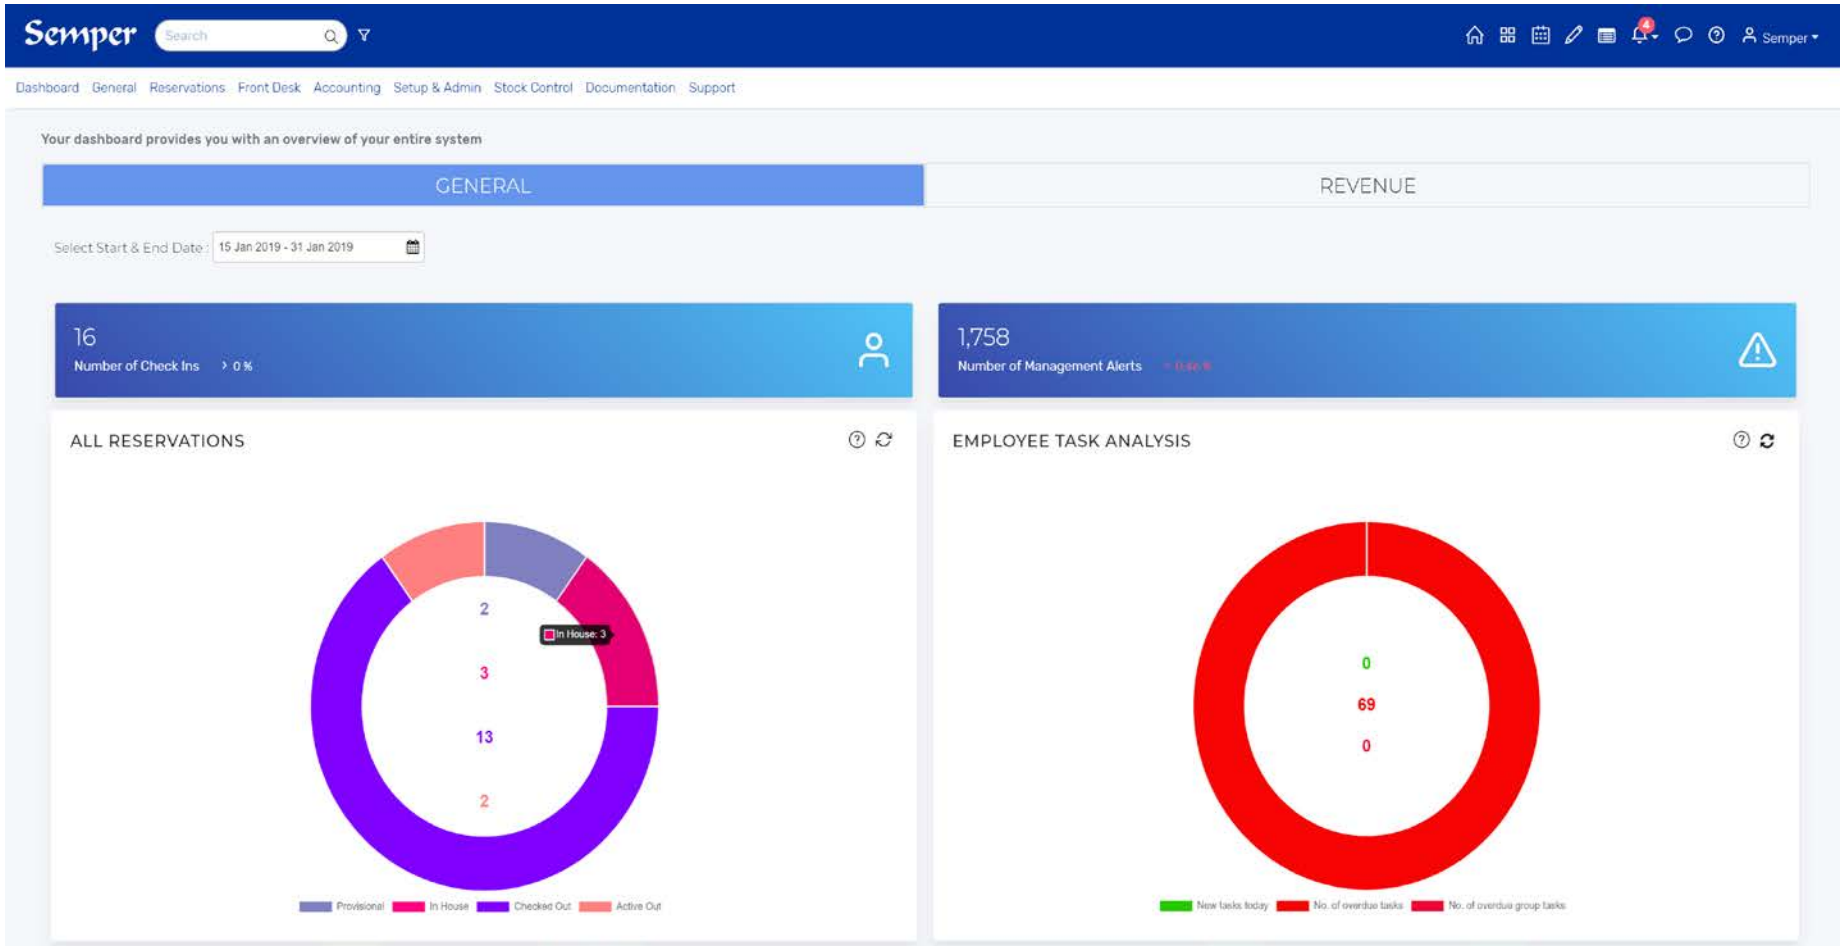

Semper

Management Dashboard

Designed for venue owners/management who wish to receive management information on their cell phones, tablets or PC's whenever they wish

Information is split in two sections. *General Management* and *Revenue* information which is presented in graphs where applicable with the ability to drill down to the detail

The next two slides will give you an idea of the look and feel of the new management dashboard

Please note that the contents of this document is private and confidential

Occupancy	795%	441%	455%	564%
Available	704	748	748	2200

Management Dashboard

You choose which information you wish to receive and the order

- ❑ View your existing calendar in a browser and see which reservations have been recorded and where availability exists

- ❑ Information you can select (which could be for a single day or a selected period) – under the *General* section:
  - ✓ All reservations
  - ✓ Reservations arriving, in house or departing for a selected date or period
  - ✓ Income analysis
  - ✓ Future projected income
  - ✓ Employee tasks analysis (who has outstanding tasks)
  - ✓ Own tasks (which of your tasks are outstanding)
  - ✓ Revenue summary
  - ✓ Management alerts highlighting issues that need attention such as;
    - o Backups not made
    - o Rates that are about to expire
    - o Incomplete stock takes or stock not closed
    - o Reservations with zero or missing transactions
    - o Incomplete or not processed provisional or confirmed reservations etc..
  - ✓ Occupancy analysis

- ❑ Under the *Revenue* section:
  - ✓ Revenue for a selected day-end or period
  - ✓ Deposits analysis
  - ✓ Cashflow analysis

Semper in the browser – going forward

The management dashboard is the first step in the conversion of the entire Semper system in a browser which can be implemented on a local server (as you operate now) or you can operate 100% in the cloud.

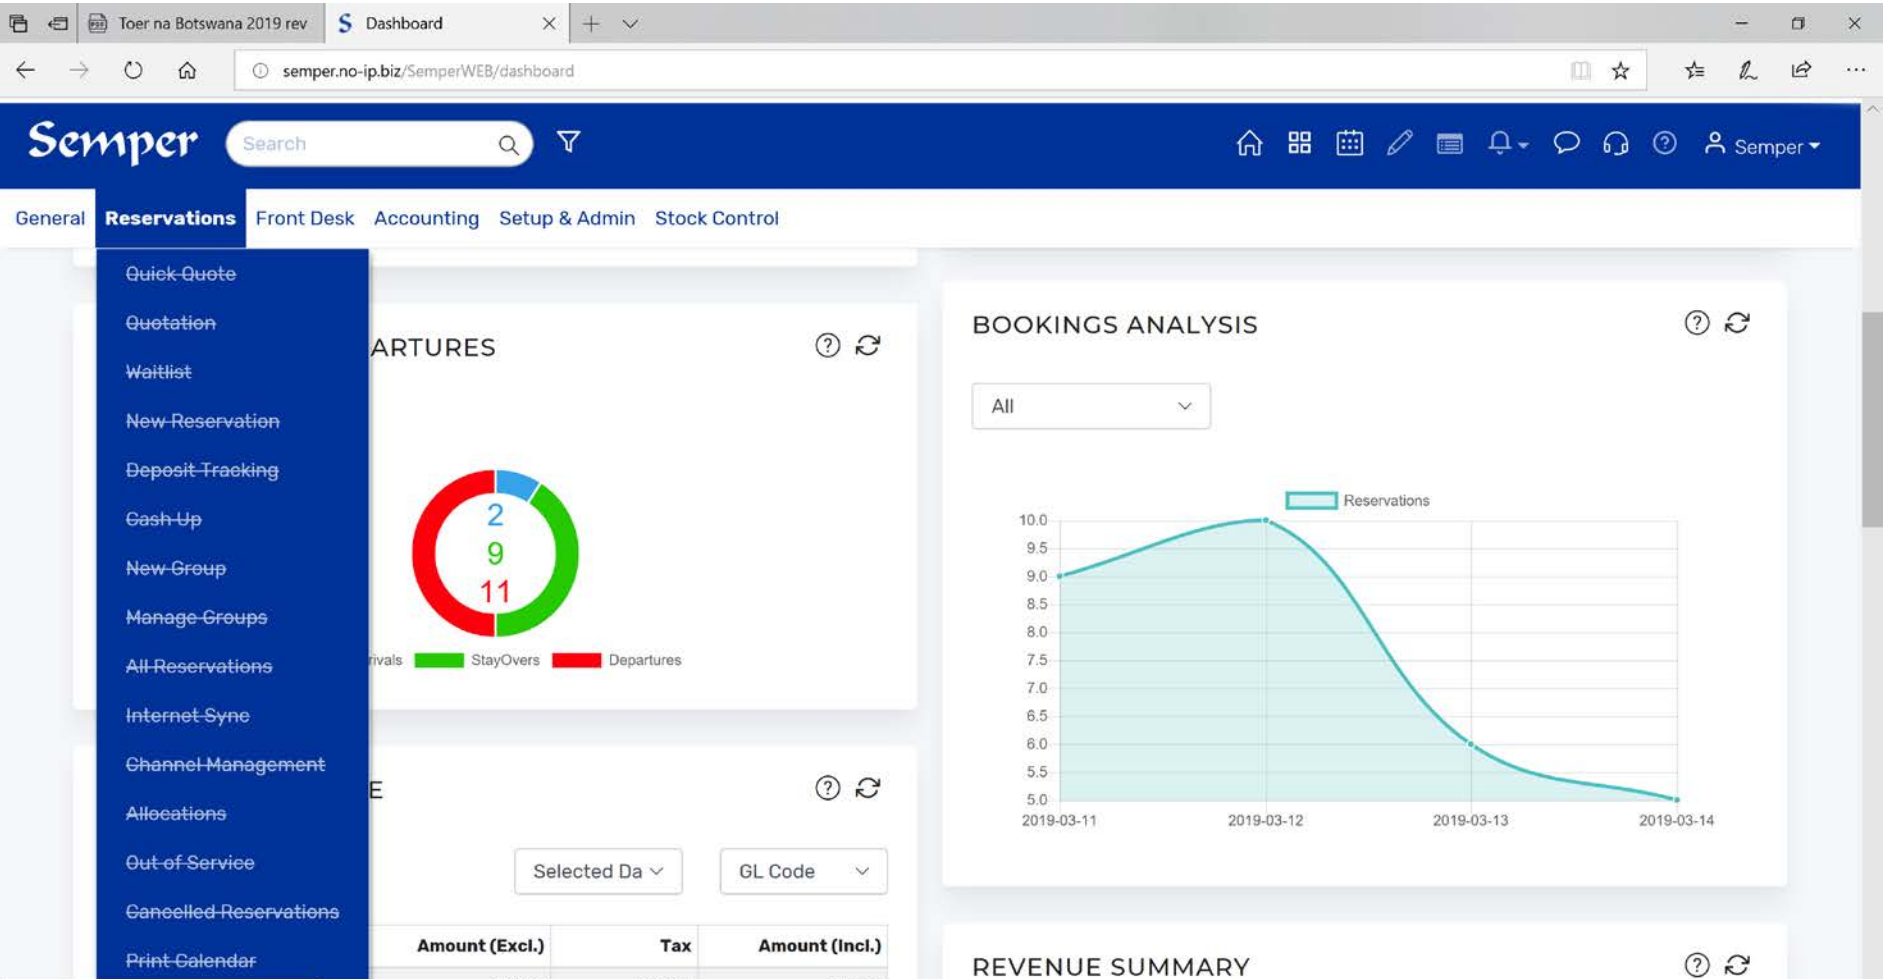

- There is a new look and feel to the browser system which is more modern. We take advantage of the new environment to present you with a new and exiting Semper system.

- All the same features you use today will be available in the browser system

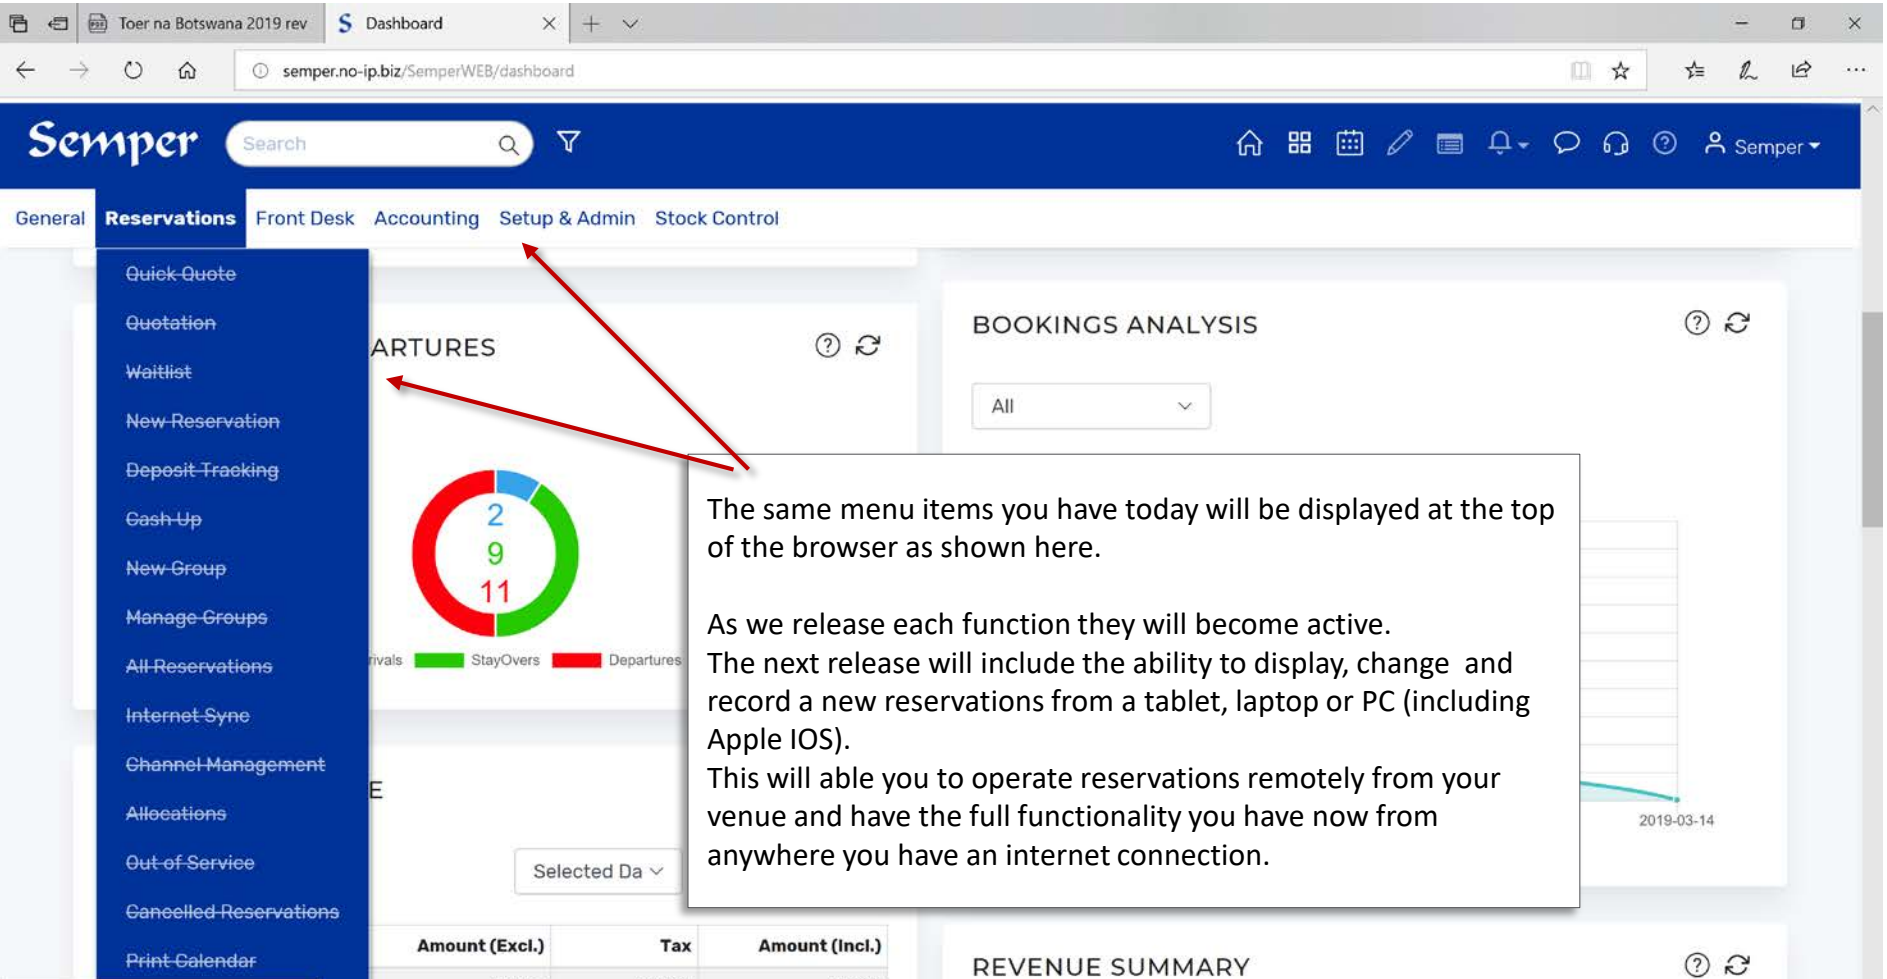

- We will constantly (every month or two) add new features. Once done will be made available to you. This will give you the chance to get used to it and give us your valuable feedback. There will be NO disruption to your existing system or how it works

- The next slides will give you an idea how the new browser system looks and works.

Look and feel of your Semper system in the browser

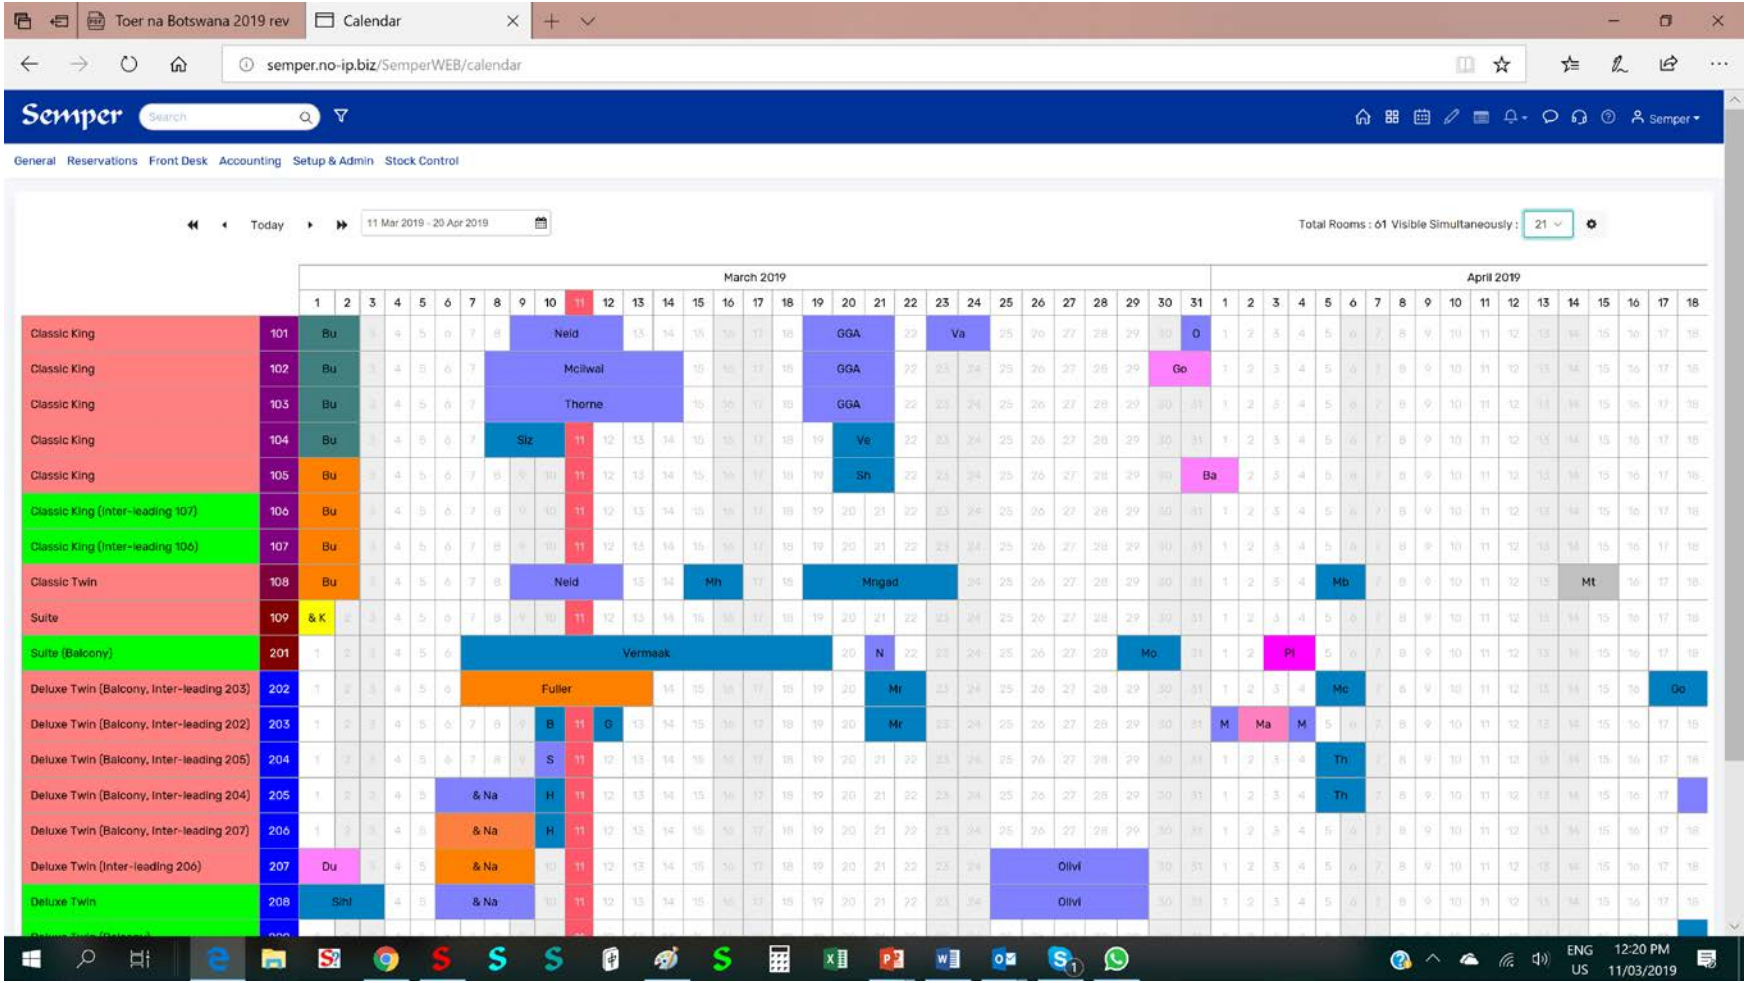

Look and feel of your Semper system in the browser

The same menu items you have today will be displayed at the top of the browser as shown here.

As we release each function they will become active.
The next release will include the ability to display, change and record a new reservations from a tablet, laptop or PC (including Apple IOS).
This will able you to operate reservations remotely from your venue and have the full functionality you have now from anywhere you have an internet connection.
